**SECRET DOCUMENT -- FOUNDATION INTELLIGENCE AGENCY**

# FOUNDATION INTELLIGENCE AGENCY

## ORGANIZATIONAL STRUCTURE, RANKS, AND HIERARCHY

**CLASSIFICATION LEVEL: LEVEL 4 // SECRET**

| | |
|---|---|
| **DOCUMENT DESIGNATION** | FIA-0091-ORGSTRUC |
| **CLASSIFICATION LEVEL** | Level 4 — Secret |
| **PREPARED BY** | Office of the Director, FIA |
| **APPROVED BY** | Director, Department of External Affairs |
| **OVERSIGHT** | O5 Command |

This document provides a comprehensive overview of the organizational structure, rank hierarchy, branch composition, and field cell structure of the Foundation Intelligence Agency. Access is restricted to personnel holding Level 4 clearance or above with verified Agency operational authorization. Disclosure of the contents of this document to personnel not meeting these criteria constitutes a Level IV security violation.

**UNAUTHORIZED REPRODUCTION OR DISTRIBUTION -- RAISA REGULATION 7.4**

## 1. OVERVIEW

The Foundation Intelligence Agency operates as a division of the Department of External Affairs under the Security & Operations section. The Agency is responsible for the collection, analysis, and exploitation of intelligence pertaining to Groups of Interest, Veil-aware governmental entities, hostile anomalous organizations, and any external actors whose activities intersect with the Foundation's mission. The Agency additionally conducts counterintelligence operations to protect Foundation assets, personnel, and operations from foreign intelligence penetration.

The Agency is organized into six operational branches, each headed by a Branch Chief reporting to the Director. Field operations are conducted by compartmentalized cells deployed under the authority of regional Station Chiefs.

## 2. CLEARANCE STRUCTURE

All Agency personnel hold a base security clearance level and one or more compartment designators that define the scope of information accessible to them. The base clearance level establishes the maximum classification tier a position may access. The compartment designator restricts that access to specific branches, programs, or operational domains. A base clearance level alone grants no access to Agency information without an accompanying compartment.

Clearances are expressed in the format `L[level]/[compartment]`. Multiple compartments are separated by commas.

### Branch Compartments

The following compartments correspond to the Agency's six operational branches. All personnel within a given branch hold their branch compartment as a minimum.

**FIA-OPS** Operations Branch

**FIA-ANL** Analysis Branch

**FIA-TEC** Technical Intelligence Branch

**FIA-CI** Counterintelligence Branch

**FIA-LIA** Liaison Branch

**FIA-SUP** Support Branch

### Restricted Compartments

The following compartments govern access to operationally sensitive programs that cross branch boundaries. These compartments are granted on a strict need-to-know basis and require authorization from the Director or the relevant Branch Chief.

**FIA-DCO** Deep Cover Operations. Access to the identities, legends, and operational details of embedded Deep Cover Officers. Restricted to the Chief of Operations, Cover Identity Managers, and personnel with direct operational involvement.

**FIA-XAI** Anomalous Intelligence. Access to collection programs employing anomalous objects, entities, or phenomena. All operations under this compartment are subject to Ethics Committee oversight.

**FIA-SAP** Special Access Programs. Compartments assigned to standing programs or sustained operations that span multiple branches or require access controls beyond standard branch compartmentalization. Each FIA-SAP compartment is designated individually, carries its own access roster, and is authorized by the relevant Branch Chief or the Director. Access is revoked upon conclusion of the program or upon reassignment of the individual.

**FIA-CEL** Cell Operations. Compartments assigned to deployed field cells for the duration of their operational mandate. Each cell is assigned a unique numerical identifier upon activation. Personnel deployed to a cell are granted access to their cell's compartment and are restricted to information pertaining to that cell's objectives. The compartment is expressed as FIA-CEL followed by the cell's assigned identifier. Access is revoked upon dissolution of the cell or upon the individual's departure from the cell. Personnel deployed to one cell are not granted access to any other active cell compartment unless explicitly authorized by the Operations Supervisor or Station Chief.

### Positional Designators

The following designators are unique to specific leadership positions. They are assigned upon assumption of the role and revoked immediately upon departure. A positional designator grants access across all Agency compartments within the scope of that position's authority.

**DFIA** Director of the Foundation Intelligence Agency. Full access to all Agency compartments.

**DDFIA** Deputy Director of the Foundation Intelligence Agency. Full access to all Agency compartments.

**COSFIA** Chief of Staff, FIA. Access to all Agency compartments in support of the Director's office.

**COFIA** Chief of Operations, FIA. Full access to all Operations Branch compartments, including FIA-DCO.

**CAFIA** Chief of Analysis, FIA. Full access to all Analysis Branch compartments.

**CTFIA** Chief of Technical Intelligence, FIA. Full access to all Technical Intelligence Branch compartments, including FIA-XAI.

**CCFIA** Chief of Counterintelligence, FIA. Full access to all Counterintelligence Branch compartments.

**CLFIA** Chief of Liaison, FIA. Full access to all Liaison Branch compartments.

**CSFIA** Chief of Support, FIA. Full access to all Support Branch compartments, including FIA-DCO.

## 3. AGENCY LEADERSHIP

### Director of the FIA

L5/DFIA

The Director exercises overall command of the Agency, setting intelligence priorities, authorizing high-risk operations, and briefing senior Foundation leadership. The Director reports to the Director of the

Department of External Affairs and, through them, to the designated Overseer.

**Deputy Director of the FIA** L5/DDFIA

The Deputy Director serves as the Agency's second-in-command, managing day-to-day administration and inter-branch coordination. The Deputy Director assumes command in the Director's absence.

**Chief of Staff** L4/COSFIA

The Chief of Staff manages the Director's office, controls internal information flow, and oversees administrative scheduling. The Chief of Staff serves as the primary gatekeeper to the Director for all non-emergency communications.

## 4. BRANCH I: OPERATIONS

The Operations Branch conducts clandestine human intelligence collection, source recruitment, and covert operations against designated targets. This is the Agency's primary field element.

### Branch Command

**Chief of Operations** L5/COFIA

The Chief of Operations commands the Operations Branch and is responsible for all clandestine operational activity across the Agency's global area of operations.

**Station Chief** L4/FIA-OPS

The senior Agency officer at a designated Foundation site or regional command, responsible for all Agency operations within that area of responsibility. Station Chiefs exercise operational authority over all Agency cells and personnel deployed within their station's jurisdiction.

**Operations Supervisor** L4/FIA-OPS

The Operations Supervisor serves as a mid-level operational manager within a station, supervising multiple case officers, handlers, and deployed field cells. Operations Supervisors manage day-to-day tasking, coordinate between cells, and report to the Station Chief.

### Operational Personnel

**Senior Case Officer** L4/FIA-OPS

The Senior Case Officer is an experienced officer who manages complex source networks, oversees high-value recruitment operations, and mentors junior Case Officers. Senior Case Officers may be assigned as Cell Leaders for sensitive deployments and frequently serve as acting Operations Supervisors when operational demands require it.

**Case Officer** L4/FIA-OPS

The Case Officer is the core operational role within the Agency. Case Officers identify, assess, recruit, develop, and manage human sources within Groups of Interest, hostile organizations, and Veil-aware governments. A Case Officer may oversee multiple Handlers simultaneously.

**Field Contact & Intelligence Handler** L3/FIA-OPS

The Handler maintains direct ongoing contact with established human assets, servicing the asset's intelligence product, managing their security, providing tasking from the Case Officer, and ensuring the asset remains operationally viable. Handlers serve as the primary point of human contact for recruited sources.

**Deep Cover Officer** L4/FIA-DCO

Officers operating under long-term embedded cover identities within Groups of Interest or external organizations. Deep Cover Officers maintain fabricated legends for extended periods, often months or years, and operate with minimal direct contact with Agency infrastructure to preserve their cover. These are the Agency's most sensitive and most vulnerable human assets.

## 5. BRANCH II: ANALYSIS

The Analysis Branch processes raw intelligence collected by all other branches and produces finished intelligence assessments for Foundation leadership.

### Branch Command

**Chief of Analysis** L4/CAFIA

The Chief of Analysis commands the Analysis Branch and is responsible for the quality, accuracy, and timeliness of all finished intelligence products.

### Analytical Personnel

**Senior Intelligence Analyst** L4/FIA-ANL

Experienced analysts who produce high-level finished intelligence assessments and deliver briefings to senior leadership. Senior Analysts typically specialize by target: a designated Group of Interest, a regional threat portfolio, or a thematic area such as anomalous arms proliferation.

**Intelligence Analyst** L3/FIA-ANL

Working-level analysts who process raw intelligence reports, cross-reference with existing holdings, identify patterns, and draft assessments. Analysts are organized by target group or regional focus within the branch.

**Threat Assessment Officer** L4/FIA-ANL

Specialized analysts focused on evaluating threats to Foundation operations, facilities, and personnel from external actors. Threat Assessment Officers produce assessments that feed into the Security Department's protective planning and the Department of Crisis Assessment's scenario modeling.

## 6. BRANCH III: TECHNICAL INTELLIGENCE

The Technical Intelligence Branch conducts signals intelligence collection, electronic surveillance, and — where authorized — anomalous intelligence collection operations.

### Branch Command

**Chief of Technical Intelligence** L4/CTFIA

The Chief of Technical Intelligence commands the branch and is responsible for all technical collection programs and the development of new collection capabilities.

### Technical Personnel

**Senior Signals Intelligence Officer** L4/FIA-TEC

The Senior Signals Intelligence Officer supervises collection programs targeting designated communications networks, manages junior Signals Intelligence Officers, and is responsible for the technical direction of signals intercept operations within their assigned area of responsibility.

**Signals Intelligence Officer** L4/FIA-TEC

The Signals Intelligence Officer intercepts, decrypts, and analyzes communications from Groups of Interest and other designated targets. Signals Intelligence Officers coordinate closely with the Department of Informational Technologies and RAISA on technical infrastructure requirements.

**Surveillance Specialist** L3/FIA-TEC

The Surveillance Specialist deploys and manages physical and electronic surveillance operations in support of clandestine activities, including wiretaps, tracking devices, observation posts, remote monitoring equipment, and countersurveillance detection.

**Anomalous Intelligence Specialist** L4/FIA-TEC, FIA-XAI

Officers trained in the application of contained or approved anomalous objects, entities, or phenomena for intelligence collection purposes. Operations involving anomalous collection methods require explicit authorization from the Director and are subject to Ethics Committee oversight. These officers coordinate with relevant Research & Containment departments on a case-by-case basis.

**Open Source Intelligence Officer** L3/FIA-TEC

The Open Source Intelligence Officer monitors publicly available information, media, academic publications, and online forums for indicators of anomalous activity, Group of Interest operations, or Veil breaches. Open source collection provides early warning and contextual support for clandestine operations.

## 7. BRANCH IV: COUNTERINTELLIGENCE

The Counterintelligence Branch identifies, tracks, and disrupts foreign intelligence operations directed against the Foundation. When a confirmed internal penetration is identified, the case is referred to the Department of Internal Affairs for investigation and prosecution.

### Branch Command

**Chief of Counterintelligence** L5/CCFIA

The Chief of Counterintelligence commands the branch and maintains a close working relationship with the Director of the Department of Internal Affairs to ensure seamless handoff of cases involving confirmed internal penetrations.

### Counterintelligence Personnel

**Senior Counterintelligence Officer** L4/FIA-CI

The Senior Counterintelligence Officer manages complex counterintelligence investigations, supervises junior Counterintelligence Officers, and coordinates with the Department of Internal Affairs on cases that may involve confirmed internal penetrations. Senior Counterintelligence Officers are responsible for assessing the scope and severity of hostile intelligence operations and recommending appropriate countermeasures to the Chief of Counterintelligence.

**Counterintelligence Officer** L4/FIA-CI

The Counterintelligence Officer identifies and disrupts intelligence operations by hostile entities directed against Foundation personnel, facilities, and operations. Counterintelligence Officers study adversary tradecraft, detect recruitment attempts against Foundation personnel, and conduct investigations into suspected hostile intelligence activity.

**Counterintelligence Analyst** L3/FIA-CI

The Counterintelligence Analyst provides the analytical backbone of the branch, studying adversary intelligence organizations, mapping their known capabilities and tradecraft patterns, and producing threat assessments that inform operational priorities. Counterintelligence Analysts maintain running profiles of hostile intelligence services associated with Groups of Interest and flag anomalous patterns in personnel behavior or communications that may indicate hostile targeting.

**Deception Operations Officer** L4/FIA-CI

The Deception Operations Officer plans and executes denial and deception operations designed to mislead hostile intelligence services about Foundation capabilities, intentions, and vulnerabilities. These operations involve the controlled release of disinformation through channels known to be monitored by adversaries, and require close coordination with the Operations Branch to ensure that deception activity does not compromise ongoing clandestine operations.

**Defector Handling Officer** L4/FIA-CI

The Defector Handling Officer manages the intake, debriefing, vetting, and resettlement of individuals defecting from Groups of Interest to the Foundation. The Defector Handling Officer is responsible for assessing the authenticity of the defector and the reliability of the intelligence they provide, as defectors may be hostile plants.

## 8. BRANCH V: LIAISON

The Liaison Branch manages the Agency's working relationship with the Department of External Affairs and oversees authorized intelligence-sharing arrangements with the intelligence services of external organizations.

### Branch Command

**Chief of Liaison** L4/CLFIA

The Chief of Liaison commands the branch and is responsible for managing the Agency's coordination with the Department of External Affairs as well as all authorized intelligence-sharing agreements with external organizations.

### Liaison Personnel

**External Affairs Liaison** L4/FIA-LIA

The External Affairs Liaison serves as the Agency's formal point of coordination with the Department of External Affairs. When the Department conducts diplomatic engagements with Groups of Interest or Veil-aware governments, the Liaison provides intelligence support, briefs negotiating teams on what the Agency knows about the counterpart's positions, intentions, capabilities, and vulnerabilities, and ensures that diplomatic activities are informed by current intelligence holdings. The Liaison also communicates departmental requirements back to the Agency for collection tasking.

**GoI Liaison Officer** L3/FIA-LIA

The GoI Liaison Officer manages intelligence-sharing relationships with the intelligence services, departments, or equivalents of external Groups of Interest. These arrangements are rare, tightly controlled, and conducted only with organizations whose cooperation has been authorized at the Director level. The nature and extent of intelligence exchanged through these channels is determined by standing agreements approved by the Director and the Director of External Affairs.

**Intelligence Liaison Analyst** L3/FIA-LIA

The Intelligence Liaison Analyst is assigned to work directly with Foundation research departments to integrate departmental expertise into intelligence assessments and facilitate the flow of relevant technical information between the Agency and departments such as Thaumaturgical Sciences, Temporal Anomalies, and Cognitive and Psychological Sciences. These officers bridge the gap between the Agency's intelligence requirements and the specialized knowledge held by Research & Containment personnel.

## 9. BRANCH VI: SUPPORT

The Support Branch provides operational infrastructure, cover identity management, logistics, and internal security for all Agency activities.

### Branch Command

**Chief of Support** L4/CSFIA

The Chief of Support commands the branch and is responsible for the operational infrastructure that enables all other branches to function.

### Support Personnel

**Cover Identity Manager** L4/FIA-SUP, FIA-DCO

The Cover Identity Manager designs, builds, and maintains cover identities for Agency personnel operating covertly, including the fabrication of documentation, employment histories, academic credentials, and digital footprints. Cover identities for Deep Cover Officers must withstand prolonged and hostile scrutiny.

**Proprietary Operations Officer** L4/FIA-SUP

The Proprietary Operations Officer manages Foundation front companies, shell organizations, and commercial entities used as cover for intelligence operations, financial transactions, and logistical support networks.

**Security Officer** L4/FIA-SUP

The Security Officer is responsible for the internal security of Agency operations, including communications security, operational security, and the protection of Agency personnel identities and source networks. This role is distinct from the Foundation's Security Department, which handles facility-level physical security.

**Intelligence Logistics Coordinator** L3/FIA-SUP

The Intelligence Logistics Coordinator manages the movement of personnel, equipment, funds, and materials in support of covert operations, ensuring operational security is maintained throughout the logistics chain.

## 10. FIELD CELL STRUCTURE

Field operations are conducted by compartmentalized cells deployed under the authority of an Operations Supervisor or Station Chief. Each cell operates as a self-contained element with its own internal chain of command, compartmentalized from other cells to limit the damage caused by compromise. Cell composition is determined by mission requirements, ranging from two personnel for low-profile assignments to ten or eleven for complex multi-objective operations. Cells are assembled, deployed, and dissolved on a mission-by-mission basis.

Upon activation, each cell is assigned a unique numerical identifier and a corresponding FIA-CEL compartment. All deployed personnel are granted access to that compartment for the duration of the cell's mandate, restricted to information pertaining solely to the cell's objectives. Personnel are not granted access to any other active cell compartment unless explicitly authorized. The compartment is revoked upon dissolution of the cell or reassignment of the individual. The clearance levels listed below reflect standing branch clearances; the FIA-CEL compartment is assigned in addition upon

deployment.

## Cell Positions

### Cell Leader (CL) L3/FIA-OPS MIN.

The Cell Leader commands the cell in the field and is responsible for mission execution, operational security, and all personnel under their command. Cell Leaders are typically drawn from the Case Officer or Senior Case Officer ranks and hold Level 4 clearance from their permanent position. Senior Field Agents may serve as Cell Leaders when operational requirements permit, retaining their Level 3 clearance with temporary mission-specific access as authorized by the Operations Supervisor or Station Chief. The Cell Leader reports directly to the Operations Supervisor or Station Chief who authorized the cell's deployment.

### Deputy Cell Leader (DCL) L3/FIA-OPS

The Deputy Cell Leader serves as the cell's second-in-command and assumes leadership if the Cell Leader is compromised, incapacitated, or separated. The Deputy also serves as the cell's primary communications link back to the station.

### Senior Field Agent (SFA) L3/FIA-OPS

The Senior Field Agent is an experienced operative capable of independent action within the cell's mission parameters. Senior Field Agents may lead sub-elements of the cell when it splits for parallel tasking and frequently mentor junior Field Agents during deployments.

### Field Agent (FA) L3/FIA-OPS

The Field Agent is the standard operational rank within a deployed cell. Field Agents conduct surveillance, countersurveillance, site reconnaissance, dead drop servicing, secure courier work, and direct support to Case Officers and Handlers.

### Technical Field Agent (TFA) L3/FIA-TEC

The Technical Field Agent is a specialist attached to the cell to operate signals intercept equipment, surveillance technology, secure communications systems, electronic countermeasures, and — where authorized — anomalous collection devices. Technical Field Agents are assigned based on mission requirements and are not included in every deployment.

## Standard Cell Compositions

| | |
|---|---|
| **Minimal (2–3)** | 1 CL, 1–2 FA. |
| **Standard (5–7)** | 1 CL, 1 DCL, 2–3 FA, 1 TFA. |
| **Extended (8–11)** | 1 CL, 1 DCL, 1–2 SFA, 3–5 FA, 1–2 TFA. |

**END OF DOCUMENT**

Access to this document is restricted to personnel holding Level 4 clearance with verified Agency operational authorization. All inquiries regarding Agency organizational structure, personnel assignments, or operational matters must be directed through the Office of the Director. Unauthorized reproduction or distribution of this document constitutes a Level IV security violation and is subject to immediate disciplinary action under RAISA Regulation 7.4.
