

CLASSIFIED DOCUMENT -- SCP FOUNDATION

ORGANIZATIONAL STRUCTURE
AND GOVERNANCE OVERVIEW

CLASSIFICATION LEVEL: LEVEL 2 // RESTRICTED

DOCUMENT DESIGNATION ADM-4072-ORGSTRUC

CLASSIFICATION LEVEL Level 2 — Restricted

PREPARED BY O5 Command / RAISA

APPROVED BY The Overseer Council

This document provides Foundation personnel with a comprehensive overview of the organizational structure, governance hierarchy, and departmental composition of the SCP Foundation. All personnel of clearance Level 2 and above are required to familiarize themselves with the contents of this document upon assignment.

UNAUTHORIZED REPRODUCTION OR DISTRIBUTION -- RAISA REGULATION 7.4

1. EXECUTIVE AUTHORITY

The Office of the Administrator

The Office of the Administrator represents the highest institutional authority within the SCP Foundation. All further information regarding the Office of the Administrator is available on a need-to-know basis and is not covered by this document's classification level.

2. SENIOR GOVERNANCE

The O5 Council (Overseer Council)

The O5 Council constitutes the Foundation's supreme governing body in practice, consisting of thirteen high-ranking officials designated O5-1 through O5-13. The Council exercises ultimate operational authority over all Foundation activities, including strategic planning, resource allocation, containment policy, research authorization, and personnel directives at the highest level.

O5 Command (Overwatch Command): O5 Command functions as the Council's primary administrative nerve center, directed by the O5 Council and staffed by senior-level personnel responsible for coordinating global Foundation operations from Site-01 headquarters.

Oversight Committees and Offices of O5-#: Each member of the O5 Council maintains an individual Oversight Committee and Office structure responsible for the direct management of specific anomalies, facilities, and departmental divisions falling within the Overseer's designated administrative purview.

The Ethics Committee

The Ethics Committee operates as an independent oversight body tasked with evaluating the moral implications and ethical costs associated with Foundation containment procedures, research protocols, and operational decisions. The Committee possesses the authority to review, challenge, and — under specific charter provisions — countermand decisions made by the O5 Council or individual Overseers when such decisions are found to violate established ethical standards or the Foundation's core principles.

3. INTERMEDIATE GOVERNANCE STRUCTURES

Site Directors' Executive Committee of the Whole (SDECotW): The SDECotW operates as a collective decision-making body comprising all Foundation Site Directors, convening to deliberate and vote on administrative proposals affecting multi-site operations and policy implementation.

Regional Commands: Regional Commands maintain administrative oversight of Foundation operations within designated geographical sectors of Earth, coordinating facility management, personnel deployment, and anomalous containment activities specific to their assigned regional territories. Each Regional Command reports to the O5 Council through its designated Overseer.

4. ORGANIZATIONAL SECTIONS

The Foundation's departmental structure is organized into four principal sections. Administrative oversight of individual departments is exercised through the Oversight Committees of the O5 Council as described in Section II.

Section A: Administration

The Administration section encompasses governance support functions and institutional services.

Foundation Academic Consortium (FAC): The Foundation Academic Consortium serves as the Foundation's official institution of higher learning, providing specialized education and research opportunities in anomalous studies for qualified Foundation personnel and approved external researchers.

Department of Finances and Accounting (DoFA): The Department of Finances and Accounting maintains comprehensive records of Foundation assets, personnel rosters, and financial transactions, ensuring fiscal accountability and resource allocation across all Foundation operations from Area-314 headquarters.

Department of Human Resources (DoHR): The Department of Human Resources oversees personnel recruitment, interviewing procedures, hiring processes, and staff welfare initiatives to ensure proper treatment of Foundation employees across all organizational levels, operating from Site-37 headquarters.

Department of Legal Affairs (DoLA): The Department of Legal Affairs provides comprehensive legal counsel and representation for all Foundation activities, managing legal compliance, contract negotiations, and judicial proceedings involving Foundation interests.

Department of Logistics and Transportation (DoLT): The Department of Logistics and Transportation coordinates the secure movement of Foundation personnel, anomalous objects, and sensitive materials between facilities while maintaining operational security and containment protocols.

Department of Medical Affairs (DoMA): The Department of Medical Affairs provides comprehensive medical support, healthcare services, and emergency medical response for all Foundation personnel across global operations and containment activities.

Section B: Information, Databases, and Records

The Information, Databases, and Records section oversees the management, security, dissemination, and technological infrastructure of Foundation information systems.

Observer: An SCP Foundation Journal: Observer serves as the Foundation's primary scientific publication, disseminating peer-reviewed research findings, containment procedures, and anomalous studies exclusively within Foundation personnel networks.

Department of Information Policy and Public Affairs (DIPPA): The Department of Information Policy and Public Affairs manages the systematic dissemination of disinformation and cover stories to civilian populations and entities operating outside the Veil, controlling news media narratives, social media content, subliminal messaging, and public-facing government communications to suppress awareness of anomalous phenomena among those not already privy to the anomalous world.

Recordkeeping and Information Security Administration (RAISA): RAISA maintains the integrity, security, and accessibility of all Foundation databases, archives, and classified information systems, overseeing information classification, access control policies, and data governance procedures from Site-7 headquarters to prevent unauthorized access and information breaches.

Department of Informational Technologies (DoIT): The Department of Informational Technologies manages the physical and technical infrastructure of Foundation computer systems, network hardware, and telecommunications resources while developing digital containment solutions for anomalies involving electronic or computational elements. It includes the Artificial Intelligence Applications Division (AIAD).

Section C: Research & Containment

The Research & Containment section constitutes the Foundation's core scientific and containment apparatus, conducting the study, classification, and containment of anomalous phenomena across all known domains of anomalous activity.

Department of Sciences (DoS): The Department of Sciences provides initial research assessment and classification for newly discovered anomalies before their transfer to specialized departments, serving as the primary intake and evaluation center for all anomalous phenomena requiring scientific analysis. It additionally oversees research into anomalous geological formations, seismic phenomena, oceanic anomalies, and anomalous material compositions that fall within conventional scientific frameworks. It includes the Mathematics Division, the Metaphysics Division, the Applied Metaphysics Division, the Geological and Oceanic Anomalies Division, and the Anomalous Materials Division.

Department of Cognitive and Psychological Sciences (DoCPS): The Department of Cognitive and Psychological Sciences conducts specialized analysis and evaluation of memetic agents, infohazards, cognitive threats, and anomalous psychological phenomena, developing containment protocols for information-based anomalies while studying mental conditions and behavioral patterns resulting

from anomalous exposure or supernatural influence. It includes the Memetics Division, the Antimemetics Division, the Humanoid Psychodynamics Division, the Esoteric Psychodynamics Division, and the Applied Patapsychology Division.

Department of Temporal Anomalies (DoTA) : The Department of Temporal Anomalies maintains expertise in chronological phenomena, temporal displacement events, and time-related anomalies under the direction of Dr. Alice Forth, developing containment procedures for objects and entities that manipulate or exist outside normal temporal flow. It includes the Parachronology Division, the Applied Horology Division, and the Chronometrics Division.

Department of Thaumaturgical Sciences (DoTS) : The Department of Thaumaturgical Sciences conducts comprehensive research into anomalous metaphysical phenomena, encompassing theoretical thaumic studies, practical ritual applications, arcane system analysis, ritual engineering, and the development of magical containment protocols. It includes the Thaumaturgy Division, the Thaumatology Division, the Alchemy Division, the Psionics Division, and the Spectral Phenomena Division.

Department of Ontokinetics (DoO) : The Department of Ontokinetics specializes in the study and containment of reality-altering anomalies, conducting primary research operations from Site-120 to understand and mitigate threats posed by entities capable of fundamental reality manipulation.

Department of Parabiological Sciences (DoPS) : The Department of Parabiological Sciences conducts comprehensive research and management of anomalous biological entities, phenomena, and systems that deviate from conventional life sciences, overseeing physiological analysis, biohazard assessment, the biological study and containment of anomalous fauna, and the study of anomalous disease transmission patterns and pathological conditions exhibiting non-standard infectious properties. It includes the Parabiology Division, the Cryptozoology Division, the Entomology Division, the Epidemiology Division, and the Xenobiology Division.

Department of Theology (DoT) : The Department of Theology specializes in the identification, capture, containment, study, and potential neutralization of theological, metaphysical, and spiritually active anomalies, including religious artifacts, entities, ritual systems, and belief-based phenomena exhibiting anomalous properties. The Department is headquartered at Reliquary Area-27 and manages objects and entities associated with divine, esoteric, afterlife-related, and culturally significant spiritual frameworks posing current or potential containment challenges. Its internal structure includes the Abrahamic Division, Dharmic Studies Division, Animistic and Folk Traditions Division, Egregorian Studies Division, Demonology Division, Comparative Theology Division, and Thanatological Studies Division.

Department of Oneirological, Noospheric, and Somniumistic Sciences (DoONSS) : The Department of Oneirological, Noospheric, and Somniumistic Sciences investigates anomalous phenomena related to sleep, dreams, subconscious states, and the broader human noosphere. The department analyzes dream-related anomalies, shared dreamscapes, sleep-induced events, and metaphysical shifts in collective human thought and memory to develop appropriate containment and research pro-

ocols. It includes the Oneirological Division, Somniumistic Division, and the Noospheric Division

Department of Linguistics and Anomalous Cryptology (DoLAC): The Department of Linguistics and Anomalous Cryptology specializes in the decipherment, analysis, and translation of anomalous languages, scripts, communication systems, codes, and ciphers, encompassing both linguistic phenomena encountered in anomalous contexts and encrypted information systems exhibiting supernatural or non-standard cryptographic properties. It includes the Semiotics Division, the Kinetography Division, the Exolinguistics Division, and the Cryptological Analysis Division.

Department of Historical and Cultural Studies (DoHCS): The Department of Historical and Cultural Studies investigates the historical influence of anomalous phenomena on human civilizations through the excavation and analysis of anomalous archaeological sites, the academic study of how anomalous interaction has shaped global religious traditions and mythological systems, and the documentation of folkloric narratives encoding records of supernatural events. It includes the Archaeology Division, the Mythology Division, the Folkloristics Division, the Ethnography Division, and the Anthropology Division.

Department of Extraterrestrial Affairs (DoEXA): The Department of Extraterrestrial Affairs oversees all aspects of extraterrestrial anomalies, alien contact protocols, and off-world projects under the leadership of Dr. L. Woomywood, coordinating operations from mission control at Site-64. It includes the Astronomy Division, the Astrophysics Division, and the Solar System Oversight Division.

Department of Dimensional Affairs (DoDA): The Department of Dimensional Affairs specializes in interdimensional phenomena, cross-dimensional travel research, and the management of anomalies originating from or affecting alternate dimensions and parallel realities.

Department of Anomalous Arts (DoART): The Department of Anomalous Arts specializes in the study and containment of anomalous objects, media, artistic movements, and aesthetic phenomena related to musical, performative, literary, visual, surrealistic, and interactive art forms exhibiting anomalous or supernatural properties and effects. It includes the Visual Arts Division, the Musicology Division, the Literary Arts Division, the Digital & Interactive Media Division, the Performative Arts Division, the Film & Cinematic Division, and the Surrealistics Division.

Department of Engineering and Technical Service (DoETS): The Department of Engineering and Technical Service provides comprehensive technical maintenance, facility construction, equipment design, and anomalous waste processing services across all Foundation installations, with specialized subdivisions handling varying security clearance levels, Keter-class containment chamber construction, and the safe neutralization and disposal of anomalous byproducts generated through containment procedures and research activities. It includes the Engineering Division, the Robotics & Cybernetics Division, the Special Technology Applications Group (STAG), the Anomalous Weapons Development Division, and the Acroamatic Abatement Division.

Section D: Security & Operations

The Security & Operations section encompasses departments responsible for the physical protection of Foundation assets, strategic threat assessment, military operations, diplomatic engagement, and intelligence activities.

Department of Crisis Assessment (DCA): The Department of Crisis Assessment functions as the Foundation's primary strategic think tank, conducting predictive analysis, threat modeling, scenario planning, and large-scale crisis simulations to evaluate potential catastrophic events resulting from anomalous activity. It develops early warning systems and mitigation strategies for containment failures and anomalous disasters, while running wargame exercises and tabletop scenarios to stress-test Foundation response protocols and inform senior leadership on emerging strategic threats.

Department of External Affairs (DoEA): The Department of External Affairs manages diplomatic relations, negotiations, and communication protocols with Veil-aware organizations, Groups of Interest, and governmental entities already possessing knowledge of anomalous phenomena, coordinating Foundation interests with external parties operating within the anomalous world. It includes the Foundation Intelligence Agency (FIA).

Department of Internal Affairs (DoIA): The Department of Internal Affairs serves as the Foundation's internal investigative and accountability body, conducting inquiries into personnel misconduct, procedural violations, ethical breaches, and institutional corruption across all organizational levels. The Department reports directly to the Ethics Committee on matters pertaining to ethical violations, personnel misconduct, and abuse of authority. On matters pertaining to counter-espionage, infiltration detection, and security breaches, the Department coordinates jointly with the Security Department and the Foundation Intelligence Agency.

Security Department (SD): The Security Department ensures the physical security of all Foundation facilities and the personal safety of Foundation personnel through the implementation of security protocols, threat assessment, and protective services.

Department of Armed Forces (DoAF): The Department of Armed Forces serves as the Foundation's military division, coordinating joint task force operations, combat responses, and armed intervention protocols for high-threat anomalous situations. It also oversees the formation, operational deployment, and deactivation of specialized Foundation Task Forces assigned to specific anomalous threats or containment objectives.

5. JURISDICTIONAL OVERLAP

The boundaries between departments and sections are administrative in nature and do not preclude interdepartmental cooperation. Containment efforts may involve personnel and resources drawn from multiple departments across different sections. Jurisdictional disputes are resolved through the relevant Oversight Committees or, where necessary, by the O5 Council directly.

END OF DOCUMENT

Personnel with questions regarding departmental assignment, interdepartmental coordination, or reporting structures should contact their immediate supervisor or the relevant Oversight Committee office. Unauthorized reproduction or distribution of this document beyond its designated classification level is a violation of Foundation information security protocols and is subject to disciplinary action under RAISA Regulation 7.4.
